Professional Summary

Multimedia Technology graduate with a strong foundation across the stack, from designing UI in Figma to writing SQL and building workflows in Power Automate. Quick learner and adaptable, ready to apply both coding and low-code/no-code skills to support AI and digital solutions. Looking to bring fresh energy, technical skills, and a strong desire to learn, grow, and contribute with the team.

Skills & Interests

- **Technical:** C#, Java, HTML, Python, PHP, TypeScript, React Native, Figma, Power Platform
- **Languages:** TOEIC Score: 705 — TNI Japanese Ability Test: Passed N4

Experience

A-HOST Company Limited

Internship - Assistant Software Professional

Phaya Thai, Bangkok

Dec. 2025 – Mar. 2026

- Built responsive UIs in Power Apps for internal business workflows.
- Ran manual functional tests, logged defects, and followed up with the dev team to verify fixes.
- Set up Power Automate flows to sync data between Dynamics 365 and other systems.
- Wrote and tuned SQL stored procedures to improve data retrieval performance for Power Apps.

Projects

Hackathon: Innovative Application for Smart Life

Oct. 2024

Python, Streamlit, Google Colab

- Trained a wound analysis model on a Kaggle dataset using Google Colab.
- Wrapped the model in a Streamlit app and deployed it end-to-end within the hackathon timeframe.
- Ran QA checks on predictions to catch edge cases before the final demo.

Hybrid Application Development

Feb. 2025

React Native, TypeScript, JavaScript

- Produced Figma prototypes that the team used as a single source of truth throughout development.
- Coded the frontend in React Native based on the approved designs.
- Worked closely with the backend team to wire up APIs and iron out integration issues.
- Revised screens based on feedback from teammates and the course advisor.

SIT Global Project-Based Learning

Feb. 2025

Unity, C#

- Built a VR game in Unity alongside Japanese exchange students over a short collaborative sprint.
- Used English throughout for all technical discussion and documentation.

Service Design Education Program

Jun. 2025 – Aug. 2025

Cross-functional Team

- Worked in a cross-functional team to map out service improvements for a real institutional problem.
- Delivered a service blueprint, user journey map, and wireframes as the core design artifacts.

TCG BanBan - Pokémon Card Price Checker

Laravel, PHP, Bootstrap

- Built a full-stack web app that lets collectors search and compare live card prices from several sources.
- Added a password-protected admin panel with full CRUD over card listings, rarity tags, and pricing.
- Made the whole UI responsive with Bootstrap so it works cleanly on phone, tablet, and desktop.

Education

Thai-Nichi Institute of Technology

Bachelor of Science, Technology Multimedia

Bangkok, Thailand

Jun. 2022 – Mar. 2026

GPA: 3.73/4.00 **First Class Honors**

Relevant Coursework: Web Creative Design and Development, Hybrid Application Development, Mobile Device Application Development, Database System, Power BI, UX/UI
