Professional Summary

Multimedia Technology graduate with a strong foundation across the stack, from UX/UI design in Figma to backend SQL and Power Automate workflows. Quick learner and adaptable, ready to apply both coding and low-code/no-code skills to deliver AI and digital solutions. Looking to contribute technical skills and fresh energy to learn, grow, and contribute with the team.

Education

Thai-Nichi Institute of Technology Bangkok, Thailand
Bachelor of Science, Technology Multimedia (First Class Honors) Jun. 2022 – Mar. 2026
GPAX : 3.73 | **Relevant Coursework:** Web Creative Design, Hybrid App Development, Power BI, UX/UI

Skills & Interests

- **Technical:** C#, Java, HTML, Python, PHP, TypeScript, React Native, Figma, Power Platform, SQL
- **Languages:** TOEIC Score: 705 | TNI Japanese Ability Test: Passed N4

Experience

A-HOST Company Limited Phaya Thai, Bangkok
Internship - Assistant Software Professional Dec. 2025 – Mar. 2026

- Built responsive UIs in Power Apps for internal business workflows and set up Power Automate flows.
- Wrote and tuned SQL stored procedures to improve data retrieval performance.
- Ran manual functional tests, logged defects, and followed up with the dev team to verify fixes.

Thai-Nichi Institute of Technology Bangkok, Thailand
Teaching Assistant 2024 – 2025

- **Java (OOP) & C# (Multimedia):** Guided students and debugged syntax/logical errors in labs.
- Proctored mid-term and final examinations to ensure academic integrity.

Projects

Hybrid Application Development Feb. 2025
Role: Frontend Developer (React Native, TypeScript, Figma, JavaScript)

- Produced Figma prototypes used as a single source of truth throughout development.
- Coded the frontend in React Native based on approved designs.

TCG BanBan - Pokémon Card Price Checker Aug. 2025
Role: Full-Stack Developer (Laravel, PHP, Bootstrap) Personal Project

- Built a full-stack web app that lets collectors search and compare live card prices from several sources.
- Added a password-protected admin panel with full CRUD over card listings and pricing.
- Made the whole UI responsive with Bootstrap so it works cleanly on mobile and desktop.

Hackathon: Innovative Application for Smart Life Oct. 2024
Role: Participant (Python, Streamlit, Google Colab) Hackathon

- Trained a wound analysis model on a Kaggle dataset using Google Colab and deployed via Streamlit.
- Run QA checks on predictions to catch edge cases before the final demo.

SIT Global Project - Based Learning Feb. 2025
Role: Participant (Unity, C#) International Collaboration

- Built a VR game in Unity alongside Japanese exchange students over a short collaborative sprint.
- Used English throughout for all technical discussion and documentation.

Service Design Education Program Jun. 2025 – Aug. 2025
Role: Participant Education Program

- Worked in a cross-functional team to map out service improvements for a real institutional problem.
- Delivered a service blueprint, user journey map, and wireframes as the core design artifacts.
